

### **Precision Rifle Pre-Shot Checklist:**

- 1) Positively identify your target and range to target.
  - a. Verify backstops and that there are no obstructions between your muzzle and the target.
  - b. Calculate your elevation adjustment. Whether dialing or holding.
  - c. Establish an initial wind call. Whether dialing or holding.
  - d. Do not close bolt or disengage safety until you are looking at your target, through your optic.
  - e. Keep your finger off the trigger, and outside the trigger guard, until you are looking at your target, through your optic.

### **Precision Rifle Post-Shot Checklist:**

- 1) This checklist is to be performed any time you break contact with your weapon.
  - a. Bring bolt to the rear. Locked (gas gun) or otherwise (bolt gun).
  - b. Remove magazine (ammunition source) from the weapon.
  - c. Run the bolt to verify there are no “hang-ups” in the chamber or on the bolt face.
  - d. Keep bolt to the rear. Locked (gas gun) or otherwise (bolt gun).
  - e. Visually, physically, and audibly verify that your weapon is clear.
  - f. Return all turrets to zero.
  - g. Close scope caps if present.
  - h. Police your brass and gear!

**Thank you!**
